

MOMENTUM

“...the impetus and driving force gained by the development of a process or course of events.

“It is never the size of your problem that is the problem. It’s a lack of momentum” John Maxwell

Here are some questions today:

Are you stuck? Are you at a standstill? Have you forgotten what direction you’re moving in or want to move in?

- *What’s keeping you standing still?*
- *What are you afraid of?*
- *Are you willing to take some baby steps, small steps forward? What would that look like?*

With momentum, often the first step is the most difficult. Take a step, take a risk, and begin.

As you move, others will join you and you’ll gain confidence.

The worst thing is to remain **STUCK** where you are, especially if that’s a place you don’t want to be!
